## GET IN TOUCH!

Mobile: +91-7013367417

Email: manishauppalapalli@gmail.com

## PERSONAL DETAILS

- Current Location Guntur
- Date of Birth October 15, 2003
- Gender Female

## SKILLS

- python
- Excel
- SQL

## LANGUAGES KNOWN

- English ( Both )

## ACHIEVEMENTS

- top 15 in class in MCA
- Top 3 in class in B.Sc - Bachelor of Science
- Top 10 in class in school

## EDUCATION

### Post-Graduation

Course MCA (Computers)  
College Vignan foundation for science technology and research  
Score 80%

### Graduation

Course B.Sc - Bachelor of Science (Electronics)  
College SRI HARSHINI DEGREE COLLEGE ONGOLE

### Class XII

Board Name Andhra Pradesh  
Medium English  
Year of Passing 2021  
Percentage 79%

### Class X

Board Name Andhra Pradesh  
Medium English  
Year of Passing 2019  
Percentage 95%

## PROJECTS

### Smart greenhouse monitoring system using iot , September 2025 - December 2025

- Smart Greenhouse Monitoring System using IoT (Internet of Things) is an automated system that helps monitor and control environmental conditions inside a greenhouse to improve plant growth and reduce manual effort.

It uses sensors to measure factors like temperature, humidity, soil moisture, and light intensity. These sensors send real-time data to a microcontroller (such as Arduino or Raspberry Pi), which is connected to the internet. Farmers or users can monitor this data remotely through a mobile app or web dashboard.

Based on the sensor data, the system can automatically control devices like water pumps, fans, heaters, and lights. For example, if the soil is dry, the system turns on irrigation; if the temperature is too high, it activates cooling systems.
