SUMMARY

Full-stack developer (MERN) with hands-on internship experience and 6 live projects. Built production-ready applications including a car rental platform, e-commerce store, and video streaming clone. Seeking entry-level frontend or full-stack developer role.

SKILLS

Frontend: JavaScript (ES6+), React, Redux, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Firebase

Database: MongoDB

Tools & Others: Git, GitHub, AWS (basics), Vercel, Render

WORK EXPERIENCE

Front End Development • Internship, Prodigy Infotech

Nov 2025 - Dec 2025

- Built 5+ responsive web applications using HTML5, CSS3, and JavaScript with cross-browser compatibility
 - Integrated third-party REST APIs to build dynamic, data-driven interfaces
 - Managed full project lifecycle independently – from UI design to deployment
 - Used Git for version control, branching, and collaboration on GitHub
-

PROJECTS

- **QuickWheels - Car Rental:** Built a car rental platform with HTML/CSS/JavaScript frontend & Node.js/Express backend, handling booking confirmation emails & auto-generated PDF receipts
 - **ShopyGlobe E-commerce Application:** Engineered a full-stack e-commerce platform with a React/Redux frontend and Node.js/MongoDB backend, featuring product listing, cart management, user authentication via JWT, and RESTful APIs
 - **YouTube-Inspired Platform:** Built a full-stack video streaming platform using the MERN stack featuring JWT authentication, custom video player, real-time likes/comments, subscriptions, and AI-style personalized recommendations
 - **Spotify Clone:** Developed a full-stack music streaming app using MERN stack with real-time chat, friend activity tracking, audio playback, and role-based admin controls
-
