Professional Profile

Web developer focused mainly on Front-End design and development using Figma, CSS, and JavaScript. I have experience collaborating with cross-functional teams. I consider myself a proactive person with a strong desire for growth and continuous learning. With a great thirst for knowledge, I am organized and enjoy working as part of a team. I am willing to use my skills to help drive the mission and vision of the company I represent.

Professional Experience

Ribot (Project) | Creation and Development | March 2022 - October 2022

- Development of the front-end for a website that allowed users to take the Revised Toulouse-Piéron Test using CSS and JavaScript..

SkillsBridge (Project) | Creation and Development | March 2023 - October 2023

- Development of the front-end for a social network-style website using JavaScript, CSS, and Bootstrap; creation of an automated response system similar to a chatbot.

Ministerio de Obras Públicas y Transportes | Professional Internship | Software Engineering Department | October 2024 - November 2024

- Development of the visual identity, web and mobile design for MOPT systems using Figma, including the update of forms, landing pages, buttons, documents, and other UI elements.
