Introduction:

Fashion, to me, is a blend of creativity and purpose. I am passionate about fashion design and enjoy creating concepts that combine aesthetics with functionality. My design approach focuses on solving modern day problems through thoughtful, innovative, and practical solutions.

11. Portrait - 2

- This dress is inspired by tomopteris, fashion illustration featuring a short, one – shoulder dress.
- The dress is purple and short, with a long ruffled cascade extending from right shoulder down towards the left side.
- A significant cluster of white pearls and smaller silver beads embellishes

Landscape Design 1

This landscape painting is a tranquil, nocturnal scene featuring a cascading waterfall under a bright full moon. The artwork uses a cool colour palette with contrasting warm tones from the moon's reflection to create a serene, dreamlike atmosphere. It is a popular, general theme in home decor and art tutorials, often symbolizing peace and abundance.

Landscape Design 2

The artwork depicts the Eiffel Tower as seen from across the River Seine, with a bridge and riverbank elements in the foreground. The composition balances the iconic landmark with the surrounding landscape, including trees and reflection in the water

One point perspective

This is a monochromatic pencil drawing utilizing one-point perspective to create a strong sense of depth and a powerful composition. A leading line guides the viewer's eye through the vast, open landscape toward the distant mountains. The use of atmospheric perspective helps create separation between the foreground, middle ground, and background.

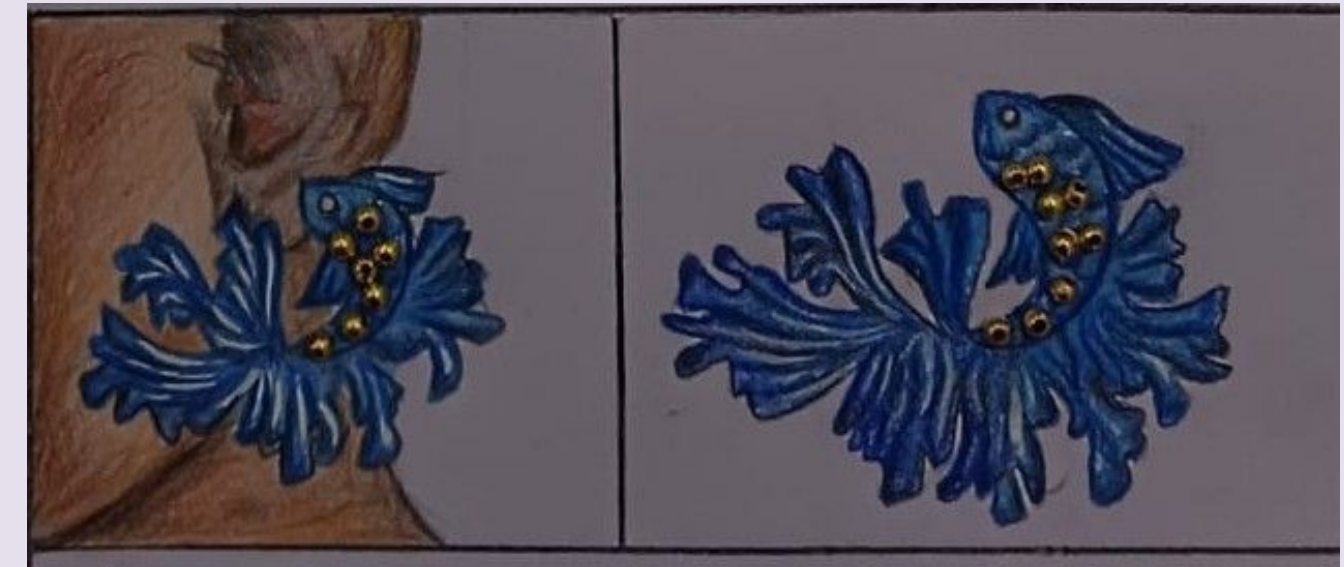

Futuristic design

This illustration is detailed, hand-drawn science fiction cityscape in a sketch or line-art style. It depicts a person looking out over a sprawling futuristic metropolis featuring dynamic, spiraling architecture and tall, modern skyscrapers, all set against a backdrop dominated by a large, ringed planet.

This design is inspired by Siamese fish. The artwork focuses on a central figure of an ornamental fish, rendered in vibrant shades of blue, highly stylized, featuring intricate flowing fins and dynamic posture.

The chair features a single, continuous, sweeping line that forms the seat, backrest, and base, creating a seamless and visually striking silhouette.

The form factor is modern and contemporary, designed to act as both a functional piece of furniture and an art object.

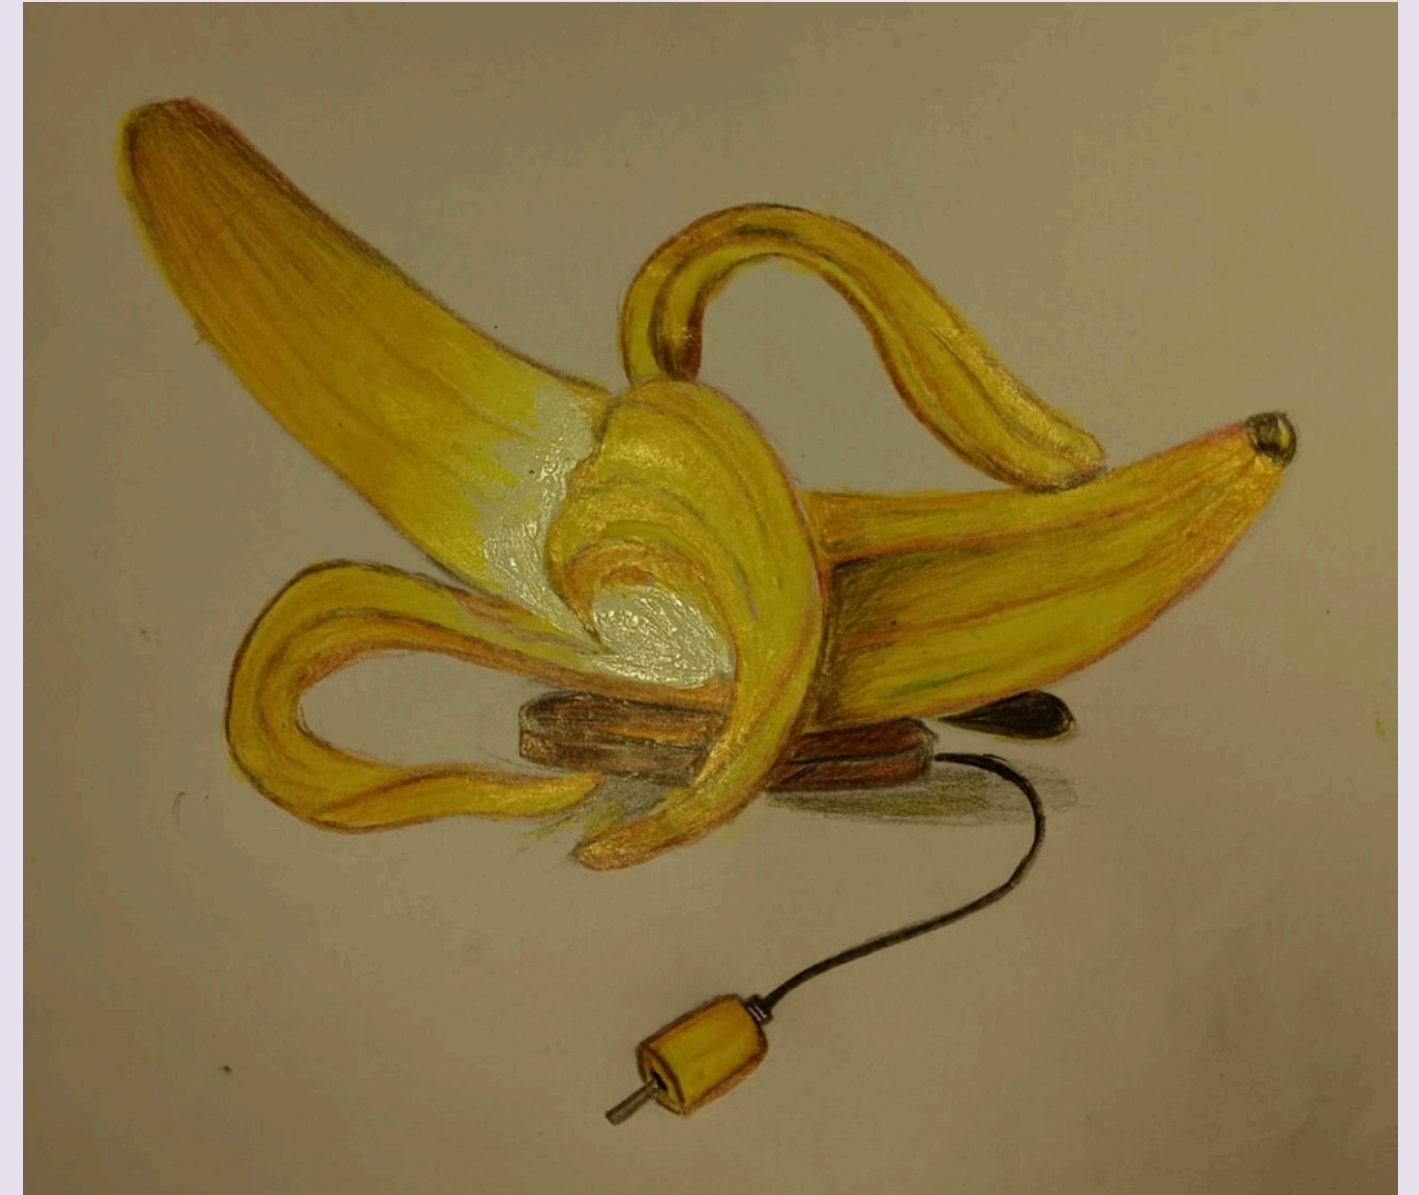

The design is directly inspired by the dynamic and ergonomic shapes found in nature, specifically drawing parallels to the graceful curves of a dolphin in motion

Inspirational design - 3

This is a surrealist mixed-media artwork that humorously transforms a banana peel into a functional electronic device, specifically a charger. The piece uses realistic drawing techniques to create a playful contrast between organic waste and technology, exploring themes of consumption and the unexpected intersections of nature and the man-made world.

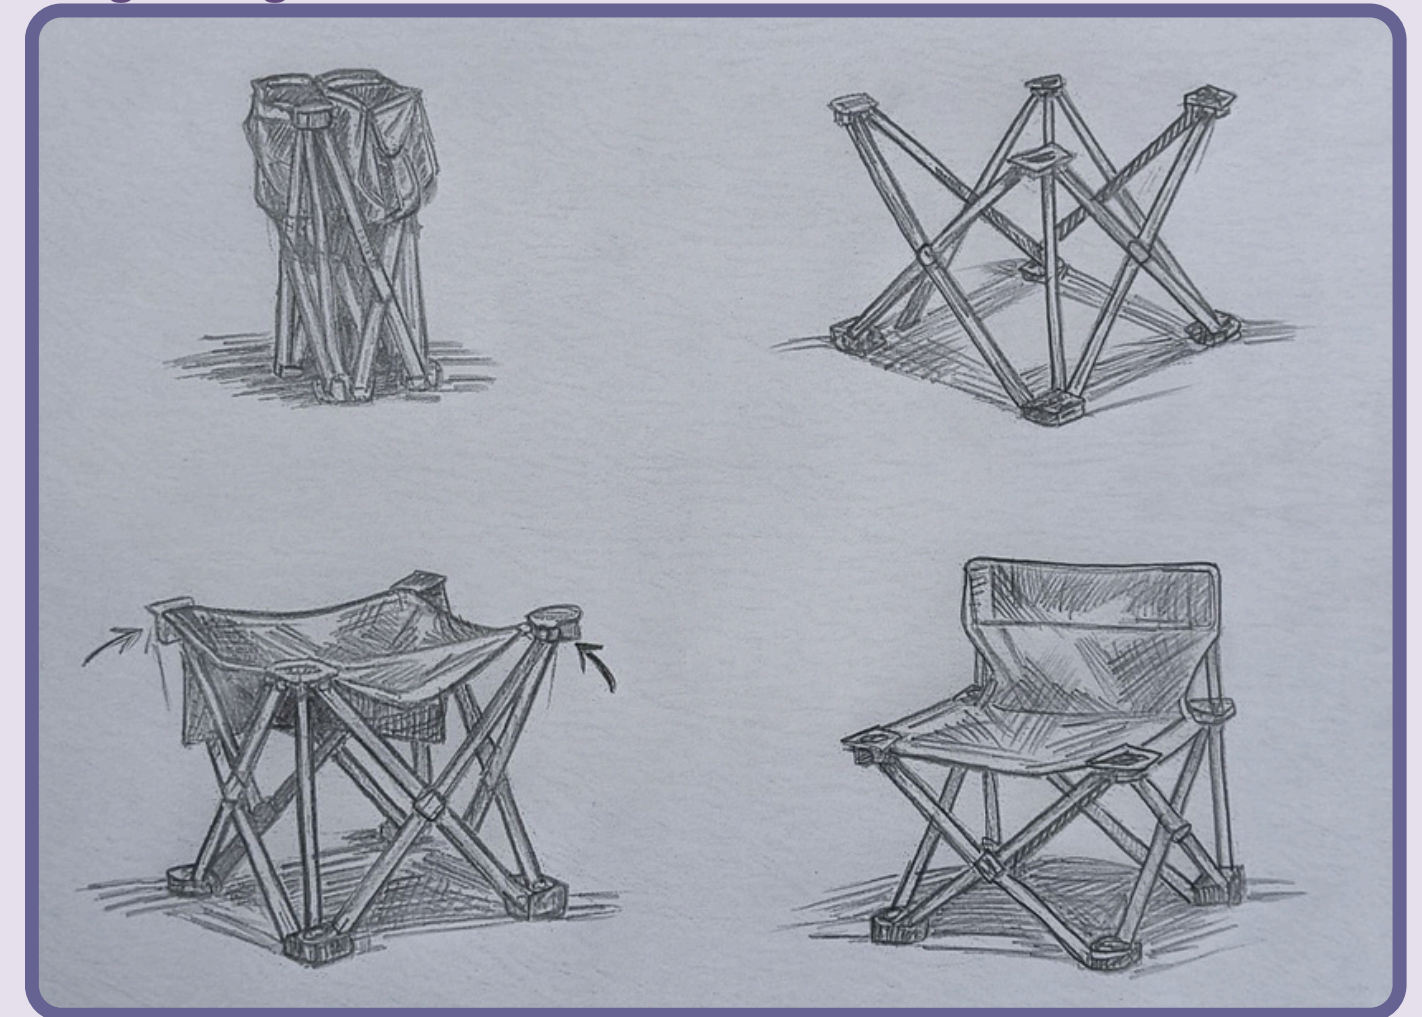

Product Type: Portable folding chair, typically used for camping, events, or as additional seating.

- Key Features:
- Portability: Designed to fold flat or to a smaller, compact size for easy transport and storage.
- Mechanism: Features a classic X-shaped frame and a fabric seat/back rest, allowing to a simple and effective folding mechanism.
- Versatility: Suitable for both indoor and outdoor use due to its lightweight and often durable construction.

The product depicted in the sketches is a portable foldable camping chair with a distinct crisscross frame design. The drawings illustrate the product in various stages from a compact, folded state suitable for storage or transport, to a fully assembled and functional chair.

These chairs are widely adopted for their ease of use in various environments, from residential settings to commercial spaces and outdoor activities.

Portrait 1

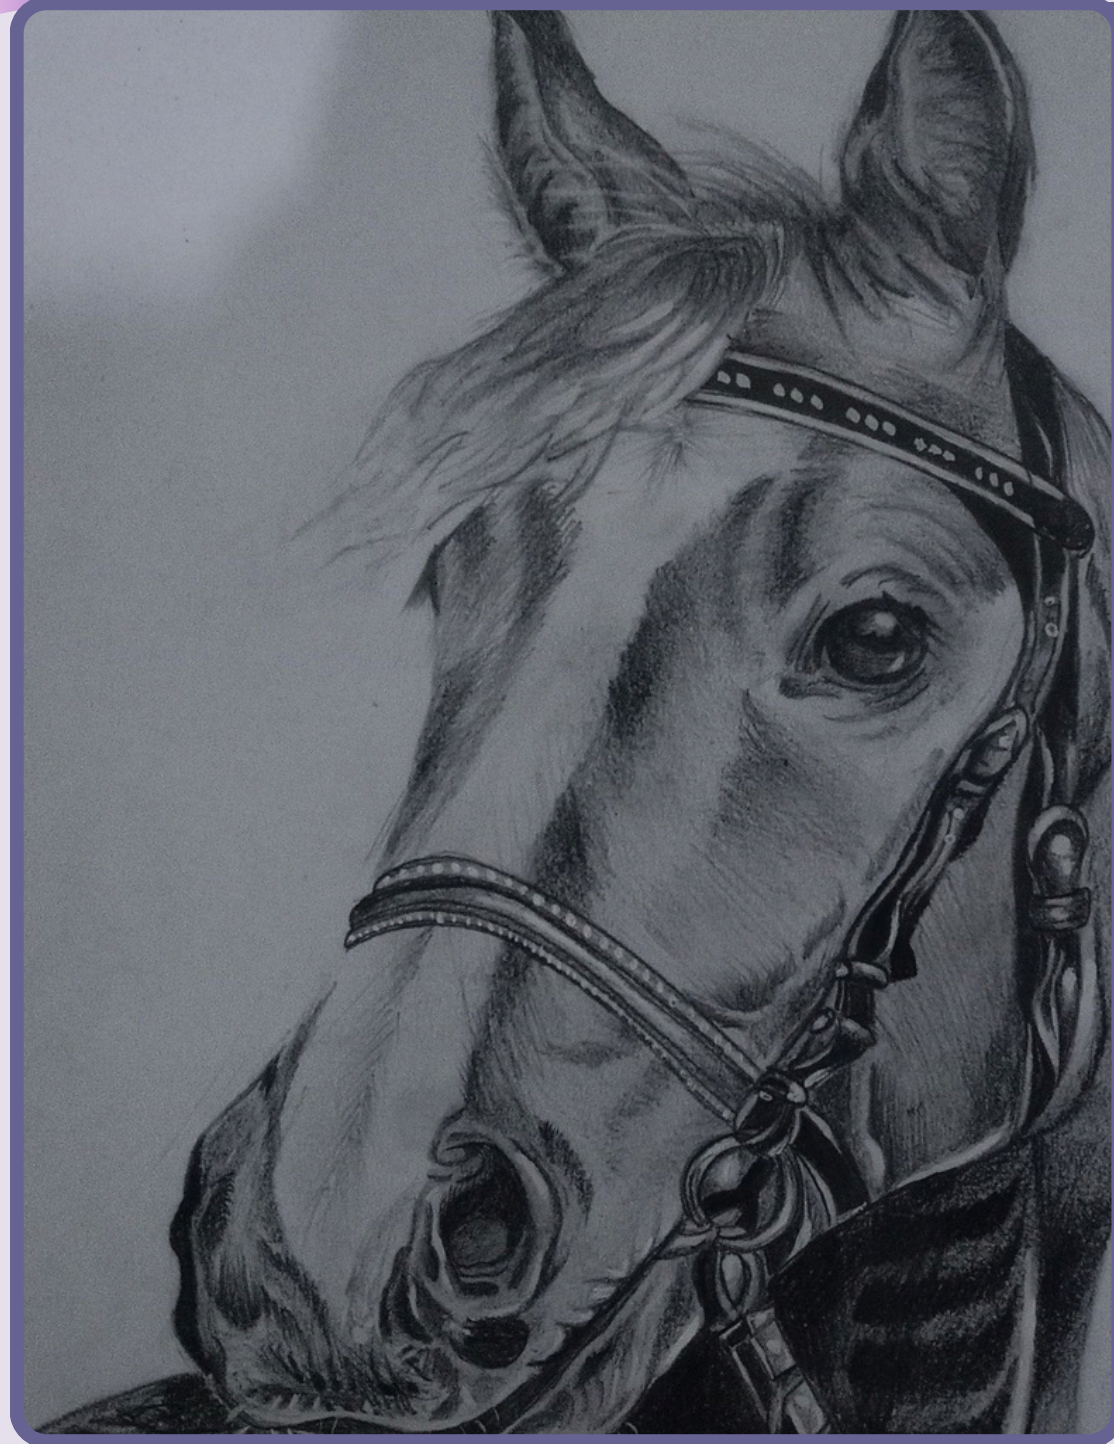

- This hyper-realistic graphite drawing is a pet portrait of Bernese Mountain Dog.
- The artwork is a monochrome or black-and-white piece, expertly using a range of shades and textures created with pencils to achieve its depth and realism. The drawing effectively captures the dog's expressive eyes, detailed fur texture, and distinctive facial markings, showcasing a high level of observation and technical skill. Such pieces are popular as personal art commissions and can be impressive additions to an artistic portfolio.

Portrait 2

This body of work focuses on capturing the majesty and intricate detail of equine subjects through photorealistic graphite drawing. Using various grades of graphite pencils on a paper, I employ meticulous layering and blending processes to build depth, form and texture, emphasizing the interplay of light and shadow.

Thank
You!
